Welcome to the

Juneau Community Garden Fall Membership Meeting

Oct. 9, 2023

Introduction – John Thedinga

- 2. Garlic planting review John Thedinga
- **3.** Fall Wrap-Up: Garden and plot winterization JT
- 4. Plot Renewal Odette Edgar
- Service Hour Opportunities John Thedinga
- 6. Board Member Elections Alan Davis & Sharon F.
- 7. Special Events Cynthia Krehbiel
- 8. Compost Project update Joel Bos
- 9. Charity Plots: 2023 Production Sharon Fleming
- **10**.Questions & Comments

Agenda

Growing Garlic

Plan Your Garlic Bed

Plan in spring (or winter)

- Prepare soil
- Keep soil dry

Caring for planted garlic

- Fertilize in spring N
- Cut scapes in June
- Harvest garlic late July
- Plant cover crop after harvest

Preparing & Planting Garlic

- Cover up Cover Crop 6 wks
- Keep box covered until time to _
- Plant garlic after Fall Equinox
- Fertilize bed (IRT plastic)
- Make holes with dibble 6" apart

Preparing & Planting Garlic

- Fertilize holes and mix
- Plant cloves 2" deep
- Record varieties you plant
- Mulch: 6-8" (seaweed, straw)
- Cover box with black plastic

Harvesting Garlic

- Harvest when 2-3 leaves yellow
- Check a couple for maturity
- End of July Dig & clean bulbs
- Bunch 6-8 & hang to dry (~6 wks)
- Temp. & humidity (dehumidifier)

Fall Wrap-Up

Saturday Oct. 21

Tool & Garden Cleaning Day (11-2), then

*2- 4:30 Halloween Fun at the Garden

October 26

Turn off water (Water remains in tank)

November 6

Dumpster & Porta Potty removed

	Remove	Plastic pipe and fleece covers		
Prepare	Clean- up	Remove crops & WEEDS (Bag tomato & potato vines & diseased plants – put in dumpster)		
your				
plot for winter	Add	Amendments – compost, brewery grain, lime and sea weed		
	Cover & Secure	Black plastic or opaque tarp		

Ready for the snow to fly

UNIVERSITY OF ALASKA FAIRBANKS

An Alaska Gardener's Fall & Winter To-Do List

Fall To-Do List

- <u>Remove crop residues from garden plots.</u> Most crop residue can be composted. Removing it also helps to prevent disease and insect pests, such as root maggots, from overwintering and returning.
- Remove and store poles, trellises and portable frames. Avoid the effects of winter damage and weathering. Needed repairs or refinishing can also be accomplished now. Mark perennials for spring. A marked stake can indicate location and provide information on what should be emerging next spring.
- Apply mulch. Mulch provides a protective, insulating layer around sensitive perennials. Avoid conditions and timing that would allow rodents to overwinter in the mulch. Use grass clippings or leaves or, even better, straw and weed-free hay. Mulch conserves moisture, reduces erosion and leaching, prevents rapid temperature fluctuations and improves soil structure after it is incorporated. Don't forget spring removal.
- Surround perennials in containers with insulating mulch. The amount of soil in containers is not sufficient to buffer the fluctuating extremes of winter weather. Other options would be to place the container in the ground or store the plant in a sheltered location such as a crawl space or cool garage.

- Put away hoses and sprinklers. Drain completely. Check for cracks and other damage. Store in a location where they will not be subject to physical damage.
- Store clay and terra-cotta pots out of the weather. Clean thoroughly if they have been used. Store in a dry location away from activities that may cause breakage.
- Keep evergreen and deciduous shrubs well watered before the ground freezes. Watering prevents winter desiccation. Plants can lose water even during dormancy. Watering is ineffective after the ground freezes. Insufficient moisture, frozen ground and winter wind combined can result in drying or winter kill.
- Carry out any garden expansion plans at this time. Fall is usually a time of decreased activity, which allows opportunity for these projects. Conduct a soil test on the new garden area to determine fertility and liming requirements. This may be a good time to construct raised beds and improve the soil for their use.
- Plant bulbs. Soil should be well drained. Fall planting allows time for root development so that the bulb can produce and push forth leaf growth as soon as spring soil conditions allow

Plot Renewal –

Odette Edgar

RENEW YOUR PLOT FOR 2024

Work all service hours, as required to renew your plot

To report hours, go to Juneau Community Garden website:

- 1. Click on Service Hour tab
- 2. Click on Service Hour Form
- 3. Fill in your Hours on-line

Put your plot to bed for the winter

<u>Re-apply & pay Nov 1 - Feb 1, 2024</u>

Document your service	ce hours here.

<u>Re-apply & pay Nov 1 - Feb 1, 2024</u>

Go to Juneau Community Garden Website:

- 1. Click on Apply for a Plot tab
- 2. Click on Member Renewal and fill in form
- 3. You will be sent a PayPal invoice, or you can send a check

Service Hour Opportunities

- Tool cleanup
- Water shut down
- Clear outside of fence line
- Weed whacker repair
- Wheelbarrow maintenance
- Children's bikes & toy maintenance
- Repair or make a new weathervane
- Clear weeds from weed pile walkway
- Weed reclamation plots
- Winterize mower & weed whackers
- Charity plots See Sharon
- Compost Project jobs

Board Member Election

Alan Davis & Sharon Fleming

Special Events Cynthia Krehbiel

2023 Activities

- Spring Plant Sale
- Orientation Potluck
- Rhubarb Fest
 - 3 Garden Work Parties
 - Harvest Fair

Halloween at the Garden – Saturday, Oct 21st

Plant Sale – Safeway Parking Lot

Plant Sale Helpers & Shoppers \$2,853 Net Proceeds

Rhubarb Fest Helpers

Sunshine for the Rhubarb Fest!

\$3,010 Net Proceeds For Harvest Fair!

Salad Dressing Sold Fast!

Harvest Fair Soup Making Crew

Thank you to all who made our 2023 activities possible!

Harvest Fair Fun

Compost Project Update JUNEAU COMMUNITY GARDEN 2023

What we have been up to lately

- Making high quality compost using mostly brewery grain and wood chips, also some seaweed & sawdust
- Spreading wheelbarrows of compost on the charity and Master Gardener plots.
- Delivered ½ yard of compost to the school gardens of Kaxdigoowu Héen & Sit' Eeti Shaanáx; plan to put another ½ yard on these gardens prior to next season
- We had been allowing 6-five gal. buckets/plot this season. Today it will increase to 10-five gal. buckets to allow members to amend their plots this fall. The 10 buckets is cumulative for 2023.
- Improved a drainage ditch and made a plywood wall to facilitate woodchip delivery

Rules for getting your hands on some of this black gold!

 Take the compost from the left side of the compost structure. As the left side empties we will shovel the pile over to the left.

2. 10 buckets per plot total for 2023

Compost is made from woodchips, so you may want to sift them out before you add it to your plots.

What can you do to help?

Turn the piles! 1. Water the piles 2. Bring seaweed 3. Clean out the 4. drainage ditch 5. Fix the sifter for the wheelbarrows

This pile is cooking!

The piles need lots of water to Keep microbes happy and doing there job. Takes about ½ hr to thoroughly water the piles.

There is a hose that is longer and will reach from the middle aisle across the road to the structure. You typically do not have to water the pile on the left

Frequently asked questions

Can I add my food scraps, animal manure, garden wastes, etc. to the pile?

No, but thanks for the offer rodents e. coli clubroot

Please feel free to collect rock free seaweed and add it to the pile on the right within the roofed area and earn service hours.

Many thanks!

Devil's Club Brewery

Juneau Composts

and all of the members who have volunteered their time and energy over the years How do I get involved with the compost committee and earn my service hours?
